Players are matched to different trade goods. In trade value order (coffee goes first), players place their trade good on any bid value ranging from 0 to 5 VP (0.5VP increments). Only seats up to the number of players may be bid on. Bids may be any value higher than the current bid for a particular seat. Outbid markers are removed and rebid in order, outbidding the same or another seat. A player whose bid is winning does not get another bid. Bidding goes around to the next player without a bid in play until all players' bid markers are on different seats. Their final bid representing the VP handicap subtracted from that player's final score & the player number. Player 5 is included even though most tournaments do not use 5-player games.
